Brayan Javier Mejía Saavedra

Academic profile | Cochabamba, Bolivia

mesabrabo@gmail.com | LinkedIn

I have completed Biomedical Engineering studies and continue studying Systems Engineering, with experience from a MARCA MERCOSUR exchange at UNESP. I coauthored a conference paper in the INCITEL 2025 proceedings about stress and anxiety among biomedical engineering students. My interests include embedded systems, digital health and applied research. DOCIA and AgroEscudo provide contexts for design and validation questions; their entrepreneurship recognitions are not presented as scientific evidence of effectiveness.

EDUCATION & MOBILITY

Universidad del Valle · Univalle
Biomedical Engineering studies completed | 2022 - 2026

Universidad Mayor de San Simón · UMSS
Systems Engineering student | 2022 - Present

Universidade Estadual Paulista · UNESP · Brazil
MARCA MERCOSUR academic exchange | 2024-08 - 2024-12

Biomedical Engineering program completion and ongoing Systems Engineering studies confirmed by the author. Formal degree conferral is not inferred.

CONFERENCE PUBLICATION

Assessment of stress and anxiety levels among Biomedical Engineering students at Universidad Privada de Valle Cochabamba

Brayan Mejía; Sergio Vásquez; Marcelo Cruz; Melissa Herrera | Anais do INCITEL 2025 · Inatel, Brazil · pp. 24–28 · ISSN 2359-6457

Read official proceedings

Paper in Portuguese. No individual DOI identified. It is not a clinical validation of DOCIA.

RESEARCH INTERESTS

Biomedical engineering | Embedded systems | Internet of Things | Digital health | Applied research | Technology for agriculture

LEADERSHIP & COMMUNITY

IEEE Univalle: president, 2025-2026, according to the CV. SCEIB: general secretary in the INCITEL 2025 author biography; full term unconfirmed.
